Title: Enabling Families to Cope Effectively with the Death of a Family Member

Description: The presenters will invite attendees to view the death of a family member as a unique crisis for each member of the family and to consider how to empower each family member to cope with grief in a therapeutic way. Methodology will include lecture, video, small group discussion, and role play.

Objectives:

1. To challenge attendees to view death in the family as an individual crisis for each member of the family.
2. To enable participants to identify the differences in the grief experience for each family member.
3. To provide opportunities for participants to experience through role play helpful techniques for coping with the death of a family member.
