How to change your network settings to reflect the new Wi-Fi standards.

(For Mac Users.)

This guide will assist you in changing your Wi-Fi connection settings to reflect the new security and connectivity requirements.

1. Look to the **AirPort icon** on your menu bar. (Top-right) **Click** on the icon, a menu will appear.
2. Select "**Join Other Network…**"
3. Enter the network information provided below.

   Network Name: **NOBTS_PUBLIC**
   Security: **WPA2 Personal**
   Password: **Nobts.edu/wifi**
   Select the two check-boxes "**Show password**" & "**Remember this network**

4. Click "**Join**".

Upon joining, you will notice a **ripple effect** on your AirPort icon that will then turn **solid**.

Congratulations! You have successfully changed your settings to reflect our new security and connectivity standards.
