

NOBTS_PUBLIC Wireless Setup for Mac OSX

1. Look to the **AirPort** icon on your menu bar. (Top-Right) Click on the icon, a menu will appear.

2. Select “Join Other Network...”
3. Enter the network information provided below.

Network Name: **NOBTS_PUBLIC**

Security: **WPA2 Personal**

Password: **Nobts.edu/wifi**

Select the two check-boxes “Show password” & “Remember this network”

NOTE. For devices that **do not** support **WPA2** security. Our wireless network also supports **WPA-Personal** security.

4. Click “Join”.

Upon joining, you will notice a **ripple effect** on your AirPort icon that will then turn **solid**.

Nobts.edu/wifi

NOTE TO ALL PUBLIC WIRELESS USERS!

Our internet service provider (ISP) has informed us of periodic malicious and illegal activity detected of users on our network. Due to the seriousness of this issue, we are continually forced to tighten our security parameters and limit certain functions on our wireless network. **IF YOU ARE CAUGHT PARTICIPATING IN SUCH ACTIONS** (Such as the downloading or distributing pirated, illegal, or indecent content), **YOUR COMPUTER WILL BE RESTRICTED FROM CONNECTING TO OUR NETWORK AND YOUR INFORMATION WILL BE GIVEN TO THE APPROPRIATE AUTHORITIES.**
